

DEHUMIDIFIERS

Dri-Eaz refrigerant dehumidifiers remove evaporated moisture from the air for rapid and thorough drying. Rent for water damage restoration, construction, materials drying or humidity control. Dehumidifiers are especially effective when paired with the evaporative airflow of Dri-Eaz TurboDryers.

DRIZAIR® LGR 2000

- Extracts up to **21 GALLONS A DAY**
- Durable rotomolded housing
- Intuitive electronic touchpad control
- Handles heavy jobs at just 132 lb

DRIZAIR® 1200

- Removes up to **15 GALLONS A DAY**.
- Durable rotomolded housing
- Compact size for easy handling and storage.
- Intuitive electronic touchpad control.

EVOLUTION® LGR

- Keeps working in lower humidity situations- when you need it most!
- Easy maintenance
- New, durable handle design
- Incredibly efficient- just 5.0 amps

DRIZAIR® LGR 2400

- Extracts up to **30 GALLONS A DAY**
- Durable rotomolded housing
- Intuitive electronic touchpad control
- Easy-loading design

LOW GRAIN REFRIGERANT (LGR)

LGR technology is a newer, more efficient approach to dehumidification that allows the dehumidifier to perform much better in lower humidity situations - down to 20 grains per pound, depending on conditions.

The extremely dry air produced by an LGR will accelerate the evaporation of bound water out of difficult-to-dry materials like wood or concrete. LGRs are designed specifically for restoration. Ultimately, most structures will dry faster and more thoroughly with an LGR.
